Hello there,

Welcome to my portfolio! I'm Athith, a passionate web developer, photographer, and FPV drone pilot based in Toronto. Whether I'm crafting captivating websites or capturing stunning visuals from the sky, I thrive on pushing creative boundaries and delivering exceptional results.

With a solid background in web development, I've had the privilege of working on diverse projects, including the creation of a website for the renowned Toronto restaurant, RedEye. Collaborating closely with my team, I played a pivotal role in designing and implementing features that enhanced user experience and streamlined operations. My journey in web development has equipped me with a strong understanding of both frontend design and backend functionality, ensuring that every project I undertake is not only visually striking but also functionally robust.

Beyond coding and designing, I'm deeply passionate about photography and FPV drone piloting. Whether I'm behind the lens capturing breathtaking landscapes or orchestrating mesmerizing aerial maneuvers with my drone, I'm constantly driven by the pursuit of visual storytelling and innovation. My creative pursuits have not only honed my eye for detail but have also instilled in me a deep appreciation for the intersection of art and technology.

In addition to my technical skills, I bring over two and a half years of experience in customer care to the table. This experience has sharpened my communication and problem-solving skills, enabling me to empathize with clients and deliver tailored solutions effectively. I understand the importance of fostering positive client relationships and exceeding expectations at every turn. I'm thrilled about the opportunity to collaborate on exciting projects and contribute my expertise to your team. Feel free to explore my portfolio to see some of my past work, and don't hesitate to reach out if you'd like to discuss potential collaborations or opportunities.

Thank you for stopping by, and I look forward to connecting with you soon!

Best regards,

Athith Krishna Santhosh
